

ABSTRACT

Group ID: PG19CS10

Guide: Dr. Vinodu George

Problem Statement:

People who are reluctant to contact a psychologist in hospitals need to be helped in a convenient way.

Idea:

Our idea is an online medical appointment booking platform mainly focused on helping people facing mental health issues. Our purpose is to develop a project in order to help those who are facing mental health issues such as anxiety, depression, pressure, stress, grief, isolation etc... in all age groups.

Some of the features are :

- there will be an option for registration.
- clients can fix appointments according to their will.
- patient details will be encrypted to maintain confidentiality.
- location and time can be chosen by the client.
- The list of psychologists will be provided in the selected area along with their educational qualifications and availability. The client can choose from this.
- they can select online or offline consultation.
- The entire client-psychologist data shall be kept confidential.
- the client can check their progress using this.
- The major benefit is that the client can pick the location of consultation such as a clinic, park, cafe or anywhere according to their comfort.
- map feature for locating psychologists easily
- location and psychologist recommendations

By implementing this idea, People will feel more comfortable expressing their problems.
